

CITY OF CHICAGO

DEPARTMENT OF WATER MANAGEMENT

February 2, 2021

The Honorable Scott Waguespack
Alderman, 32nd Ward
2657 N. Clybourn
Chicago, IL 60614

RE: DEPARTMENT OF WATER MANAGEMENT
INFRASTRUCTURE IMPROVEMENTS IN YOUR WARD
NORTH LINCOLN AVENUE WATER MAIN: W Belmont Ave to W Wellington Ave
WEST BARRY AVENUE WATER MAIN: N Lincoln Ave to N Greenview Ave

Dear Alderman Waguespack:

The Department of Water Management (DWM) is pleased to inform you of its intent to construct a new Water Main project in the 32nd Ward. 1,987 feet of 8-inch water main with complete service connections will be installed within the limits of your ward at the subject location. Restoration will follow, including half-width street resurfacing along with repair of damaged parkway and sidewalk.

We anticipate construction will commence in late February 2021 with completion of the water main projected for April 2021 with restoration to follow. Residents of your ward will be notified prior to commencement.

After the new water main has been installed, the described area will experience an increase in the availability of water for fire protection and domestic use. This project is part of ongoing efforts in our commitment to the residents of the city of Chicago.

Every effort will be made to expedite project completion and minimize the inconvenience to your constituents. Should you or your residents have any questions regarding the progress of this project, please contact the DWM Bureau of Operations & Distribution at (312) 744-7010.

Very truly yours,

Andrea R.H. Cheng, P.E., Ph.D.
Acting Commissioner
